DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 23, 2004 has been entered.

Response to Amendment

2. Applicants' amendment filed October 22, 2004, has been entered and made of record.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-39 and 44-50 are rejected under the judicially created doctrine of double patenting over Claims 1, 7, 8-11, 24-28, 31-35, 39-45, 49, 50, 55-60, 63-67 and 70 of U. S. Patent No. 6,807,305 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter of determining a "best match" (recited as template matching in the U.S. Patent 6,807,305) of an input signal of interest (target image) from a set of candidate signals (recited as set of template images).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-13, 16, 17, 19 and 21-50 are rejected under 35 U.S.C. 112, second paragraph.

Claims 1, 26, and 38-45, 48 and 49 recites the limitation "said determining a unified transform signal" in first paragraph following the claim preambles. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-13, 16, 17, 19 and 21-25 depend on Claim 1. Claims 27-37 depend on Claim 26. Claims 46 and 47 depend on Claim 45. Claim 50 depends on Claim 49.

Claim Objections

7. Claims 26-37 are objected to because of the following informalities:

In Lines 1 and 2 of Claim 26, "A memory medium comprising program instructions which are executable" should be corrected to "A memory medium comprised in a computer comprising program instructions which are computer-executable".

In Line 4 of Claim 26, " the program instructions are executable to perform:" should be corrected to " the program instructions are computer-executable to perform:"

Appropriate correction is required.

Information Disclosure Statement

8. The information disclosure statement filed on November 23, 2004, does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information. The submitted prior art (Fourier Analysis on Finite Groups and Applications, Chapter 15) refers to other chapters such as Chapters 2, 16, 17, 18 and 21 of the document; and a plurality of references only by Authors' names which encompasses a vast amount of information not all of them necessarily related to the instant invention. It has been placed in the application file, but the information referred to therein has not been considered. This prior art will be considered if a concise explanation of the relevance with the claimed invention could be provided.

Response to Arguments

9. Applicants' have amended Claims 1, 26, and 38-44 to include the limitations of objected Claims 14 and 15. Consequently, previous rejection of these claims and their dependent claims are withdrawn.

10. New independent Claims 45, 48 and 49 that include the limitations of original Claims 1 and 11; original Claims 1, 14, and 18; and original Claims 1, 19, and 20; respectively that are patentably distinct over the cited prior arts of record.

11. Independent Claims 1, 26, and 38-45, 48 and 49 would be allowable by providing a timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) to overcome the rejection based on a nonstatutory double patenting, and if rewritten to overcome 35 U.S.C. 112, second paragraph rejection and minor informalities set forth in the Office Action.
